

HOSPITAL PORTAL WEBSITE

Group Members:

1. Hatim Sawai - 2021300108
2. Kaif Sayyad - 2021300109
3. Dhruv Shah - 2021300113

Aim: We aim to create a robust website to better connect the patients and their respective doctors of the hospital and also create a prototype for an online payment system.

Tech Stack:

Frontend: HTML, CSS, JS

Backend: Python - Flask

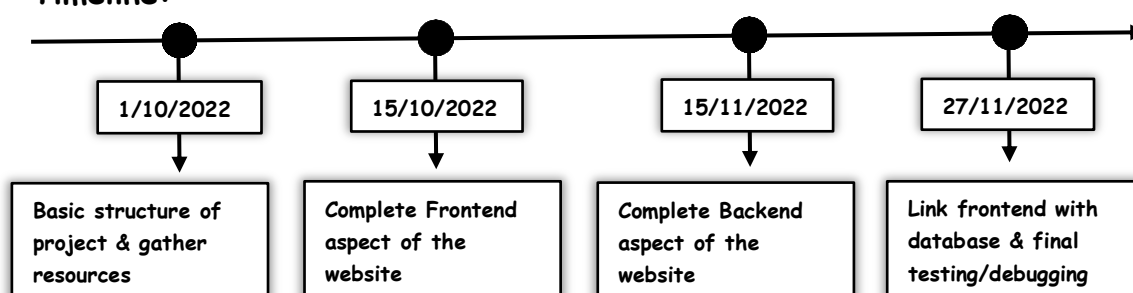

Database: MongoDB

Outline of Website:

- **Homepage** of the website
- Consists of tabs: **Patients, Doctors, Services, About, Contact Us & Login**
- **Patients Tab:** Search Bar with patient's records ordered from most recent to oldest up to a year
- **Doctors Tab:** doctors' records who currently work there
- **Services Tab: Subtabs:** Pharmacy, Ambulance
- **Login Button:** Staff Login, Patient Login
- Login with Unique id: Staff_id/Patient_id & password
- **Staff Login:** Display Schedule for the day
- **Patient Login: Subtabs:** Appointments, Records, Payment Portal
